ABOUT ME

I am a passionate MERN stack developer with a strong foundation in web development technologies. My journey in software development began with a curiosity for building interactive and user-friendly web applications. Over the years, I have honed my skills in JavaScript, React, Node.js, and MongoDB, allowing me to create robust and scalable applications.

WORK EXPERIENCE

Full stack developer (intern)

Techoriz Digital Solutions | Calicut

Jul 2023 - Feb 2024

- Design and develop robust, scalable, and high-performance web applications using the MERN stack.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Build reusable code and libraries for future use.
- Stay up-to-date with emerging technologies and industry trends.

Full Stack Developer

Feb 2024 - Present

Tecnavis Digital Solutions | Malappuram

- Full Stack Development: Developed both front-end and back-end solutions, ensuring a seamless user experience across projects.
- Project Experience:
 - Gym Management System: Created a system with features for member management, subscriptions, attendance tracking, and payment processing
 - Learning Management System (LMS): Developed an LMS with tools for course delivery, real-time communication, and performance tracking.
 - E-Commerce Platform: Built e-commerce platforms supporting product catalog management, secure checkout, and integrated payment gateways.
 - Static Website Development: Designed and deployed multiple responsive static websites, focusing on performance, SEO, and user experience.
- Front-End Technologies: Used React, HTML, CSS, and JavaScript to create dynamic, responsive, and visually engaging interfaces.
- Back-End Technologies: Implemented robust server-side logic and databases using Node.js, Express, and MongoDB, ensuring secure and efficient data handling.
- Version Control: Used Git and GitHub for version control, enabling collaborative development and maintaining project integrity.
- Problem-Solving and Debugging: Troubleshot and resolved technical issues, optimized code, and enhanced application performance across all projects.
- **Team Collaboration:** Collaborated with designers and project managers to integrate features smoothly and ensure timely project delivery.
